

## The 8th meeting of the Oslo group on energy statistics is carrying out in Baku

The Oslo group on energy statistics created in 2005 by the UN Statistical Commission during its 36 session and representing different countries, including Azerbaijan has started its 8th meeting in Baku.

The main objective of the 8th OG meeting is to develop final version of Energy Statistics Compilers Manual (ESCM) based on UN Recommendations as well as other international recommendations on energy statistics.

31 participants from 21 countries and 3 international organizations participate in this event.

According to provisional agenda participants of the meeting will discuss ESCM chapters', review presentations on the best practices and define future tasks.

The meeting will continue 4 days.
